Completed military service

Tehran, Iran

ABOUT ME

I began my professional journey in early 2019 with an internship at a company, where I developed a Windows-based hotel booking application using **C#**. Later, I was accepted into Rahnama College Backend Internship Program, where I had the opportunity to apply and expand my backend development skills. Today, I bring persistence, adaptability, and a strong technical foundation, ready to contribute to challenging backend projects.

EDUCATION

Bachelor's degree
Islamic Azad University North Tehran Branch
09/2013 – 12/2018 | Tehran, Iran
Computer Software Engineering

PROFESSIONAL EXPERIENCE

Rahnema Collage - Collagegram

07/2025 – 10/2025

- Implemented user and post search functionality using Elasticsearch.
- Wrote Dockerfile and Docker Compose configurations for backend and frontend services.
- Deployed the application on a remote server with proper Nginx configurations.

Hotel Booking Project

02/2019 – 04/2019

- Developed a Windows-based hotel booking application using **C#** and **Microsoft SQL Server**.
- Designed and implemented database schema to handle booking operations.
- Built core features including reservation management and user handling.

SKILLS

- Java Script / Type Script / Node.js / Express.js / MongoDB / Elasticsearch / Git / Postman / Docker Products / Software Deployment /
- C# / Microsoft SQL Server / .NET Framework
